Silke Van Coppenolle & Eline Tielliu

University of Ghent - 3rd Bachelor Business Engineering  
Courses: Algoritme & Datastructuren en Databasesystemen

## PUBLIC ZONE

Role	Final User Stories (Capability)
Visitor (geen login)	As a Visitor, I can browse the public marketplace, under public-data visibility constraints.
Visitor	As a Visitor, I can filter services by category, under client-side filtering constraints.
Visitor	As a Visitor, I can search services, under public-dataset search limitations.
Visitor	As a Visitor, I can open a public service preview, under read-only restrictions.
Visitor	As a Visitor, I can navigate to Login or Register, under public navigation constraints.

## ONBOARDING ZONE

Rol	Final User Story (Capability)
Visitor → Member	As a new user, I can register an account, under email/password validation rules.
Member	As a Member, I can log in, under credential validation.
Member	As a Member, I can create a company, under required-fields validation and automatic Admin assignment.
Member	As a Member, I can join a company using an invite code, under code validation rules.
Member/Admin	As a Member/Admin, I can view all companies I belong to, under company-membership constraints.
Member/Admin	As a Member/Admin, I can open a workspace, under membership access checks.

## COMPANY WORKSPACE – overview

Rol	Final User Story (Capability)
Member	As a Member, I can view company information, under read-only restrictions.
Admin	As an Admin, I can edit company information, under admin-only permissions.
Member/Admin	As a Member/Admin, I can navigate to Members, Services or Public Preview, under workspace-navigation controls.

## COMPANY WORKSPACE – members

Rol	Final User Story (Capability)
Member	As a Member, I can view all company members, under read-only permissions.
Admin	As an Admin, I can remove members, under admin-only removal permissions.
Admin	As an Admin, I can generate an invite code, under internal-only visibility constraints.
Member	As a Member, I cannot edit or remove other members, under enforced permission denial.

## COMPANY WORKSPACE – service management

Rol	Final User Story (Capability)
Member/Admin	As a Member/Admin, I can view all services, under workspace visibility rules.
Member/Admin	As a Member/Admin, I can create a new service, under required-field validation.
Member/Admin	As a Member/Admin, I can manage service information (view/edit), under validation constraints.
Everyone (incl. Visitor)	As any user, I can open a public service preview, under read-only constraints.

## MARKETPLACE – logged in

Rol	Final User Story (Capability)
Member/Admin	As a logged-in user, I can browse the internal marketplace, under company-context selection.
Member/Admin	As a logged-in user, I can “browse as: Company X”, under mandatory company-selection rules.

Member/Admin	As a logged-in user, I can filter & search services, under dynamic filtering rules.
Member/Admin	As a logged-in user, I can open internal service previews, under workspace visibility.
Member/Admin	As a logged-in user, I can start a trade request, under active-company selection constraints.

## TRADEFLOW – requests

Rol	Final User Story (Capability)
Member/Admin	As a company user, I can send outbound trade requests, under request-registration rules.
Member/Admin	As a company user, I can receive incoming requests, under linked-company filtering.
Member/Admin	As a company user, I can select a return service to complete a match, under reciprocity constraints.
Member/Admin	As a company user, I can decline a request, under archive-transition rules.

## TRADEFLOW – contracts

Rol	Final User Story (Capability)
Member/Admin	As a company user, I can view mutual trade matches, under fairness-index calculation.
Member/Admin	As a company user, I can create a proposal with scope, deliverables and validity, under draft-storage rules.
Member/Admin	As a company user, I can send a proposal, under proposal-submission rules transitioning to “Awaiting Other Party”.
Member/Admin	As a company user, I can issue a counterproposal, under proposal-override logic.

## TRADEFLOW – deals

Rol	Final User Story (Capability)
Member/Admin	As a company user, I can wait for the other party’s decision, under read-only proposal status.
Member/Admin	As a company user, I can approve a proposal, under contract finalization rules.

Member/Admin	As a company user, I can send a counterproposal, under negotiation-loop rules.
Member/Admin	As a company user, I can review active deal terms, under permanent-record access.
Member/Admin	As a company user, I can mark the other party's service as delivered, under delivery-confirmation rules.
System	As the system, I transition a deal to Completed when both sides confirm delivery.
Member/Admin	As a company user, I can view completed deals, under finalized-contract filtering.
Member/Admin	As a company user, I can submit a review (rating + text), under required-field validation.
Member/Admin	As a company user, I can submit a review only once, under permanent-record constraints.
Member/Admin	As a company user, I can view my submitted review, under read-only restrictions.
